

Use of Ethyl 3-aminobenzoate methanesulfonate MS-222 (Tricaine or MS-222)

Purpose:

To provide guidance for the use of MS-222 in the laboratory and animal facility environment. MS-222 is used at UW-Madison in animal research for a variety of research applications. MS-222 is used for anesthesia, sedation, and for euthanasia in aquatic species.

Precautions:

The following information can be used to complete the Safety section of your animal protocol.

1. Chemical hazard agents – (Identify the category of the chemical): (*Select the following*)
 - Irritant (respiratory/skin/eye)
2. Containment preparation – (Containment equipment required for the preparation of the chemical): (*Select one of the following*)
 - Fume Hood
 - Other: If a fume hood is not available, a respirator may be worn. **NOTE:** Field work does not apply. Mixing MS-222 to solution in the field, fresh open air is adequate.
3. Containment animals – (Containment equipment required for chemical administration and handling animals after exposure to the chemical): (*Select the following*)
 - No special containment needed
4. PPE needed - (for handling live animals, carcasses or animal waste/dirty bedding): (*Select all of the following*)
 - Exam gloves – nitrile
 - Safety glasses/goggles
 - Lab coat or disposable gown
5. Waste Disposal: (disposal of animal waste/dirty bedding from animals after exposure to the chemical) (*Select the following*)
 - No special precautions needed for waste/dirty bedding
6. Carcass disposal: (*Select the following*)
 - Pick up by EH&S for incineration.
 - NOTE: For field work, select Other and add No special precautions needed.
7. Chemical human risk: (*Add the following*)

MS-222 is an irritant to the eyes, respiratory system, and skin.

Additional information:

If a respirator is needed Occupational Health can also be consulted as to the appropriateness of using an N95 when higher respiratory protection is recommended. Note: personnel must receive medical clearance and fit testing for respirator use.
